With 2 years of experience in the IT industry, I specialize in DevOps with comprehensive skills in performance testing as an additional expertise. I have hands-on experience in DevOps tasks such as containerization using Docker and Kubernetes, and maintaining servers. Proficient in cloud platforms like AWS, Azure DevOps and skilled in configuration, monitoring, and troubleshooting, which enhances the stability and security of IT infrastructures. My expertise extends to server management and configuration management, ensuring smooth and efficient operations. I possess a working knowledge of Linux/Unix and troubleshooting issues during building, deployment, and production support.

Have a solid understanding of Agile Methodology, Scrum Methodology, version control, and release management concepts. I am actively seeking opportunities to leverage my DevOps skills, optimize applications, and contribute to a dynamic team in the deployment process, ensuring efficient and reliable application delivery.
